

# Do you know what your pesticides are doing to the environment?

- ❖ Study after study links the use of lawn chemicals to a host of cancers and nervous-system disorders affecting pets, families, and especially children.
- ❖ Chemical fertilizers, herbicides, and pesticides poison our waters, our soils, other living creatures, and our own bodies.
- ❖ The National Coalition for Pesticide Free Lawns reports that of 30 commonly used lawn pesticides:
  - 19 are linked with cancer or carcinogenicity
  - 13 are linked with birth defects
  - 21 with reproductive effects
  - 26 with liver or kidney damage
  - 15 with neurotoxicity
  - 11 with disruption of the endocrine system

End your contribution to the 3 million tons of inorganic fertilizer applied to American lawns each year. Learn to love the dandelion or go organic!
